

Type 6642 can be combined with...

Type 2506

Cable plug

Type 2510

ASI Cable plug

Type 6642 is a servo-assisted solenoid valve with a servo-diaphragm and a plastic body. A minimum differential pressure of 0.5 bar is required for full opening and closing. The valve can be removed from pipework.

Circuit function A

2/2-way flow valve, normally closed, with 3 way rocker solenoid pilot valve

2/2-way Solenoid Valve, servo-assisted

- Medium separated from the actuator system
- For aggressive fluids
- True union and threaded connection
- Can be mounted or removed radially for space-saving installation
- Low power consumption
